

## Product Program

Made by Eibach

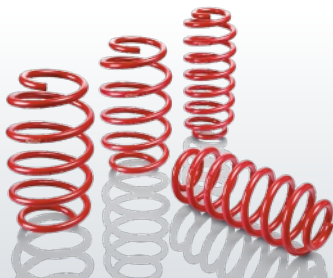

#WIR  
SIND  
**EIBACH**

## PRO-KIT

### Performance Springs

- A world leading performance suspension spring system
- Engineered and tested to work perfectly with stock dampers
- Lower center of gravity - lowers vehicle up to 40 mm
- Progressive spring design
- Performance handling
- Components certificate

## SPORTLINE

### Sport Performance Springs

- Pure sport suspension springs and appearance
- Lower ride height - up to 50mm
- Motorsport-like handling
- Progressive suspension characteristics
- Engineered and tested to work perfectly with stock dampers
- Components certificate

# PRO-SPACER

## Wheel Spacers

- Widen your stance – for better handling and appearance
- Made from high-tensile-strength aluminum alloy
- High-grade corrosion protection through a special coating process (salt spray test according to DIN 50021)
- Significant weight advantage compared to wheel spacers made from steel
- Components certificate

# ANTI-ROLL-KIT

## Performance Stabilizer Bars

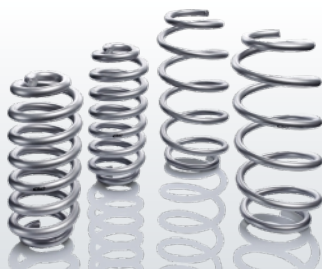

- The suspension system anti-roll-bar helps control the lateral and centrifugal forces
- This reduces body roll while cornering or making fast directional changes
- During cornering and performance driving, the CoG moves back to the ideal center of the vehicle as the anti-roll-bar transfer corner forces from the outer to the inner wheel
- This also reduces the load difference between the outer and inner cornering wheels
- Anti-roll-bars can also influence the handling characteristics like oversteer or understeer
- Components certificate and installation instruction

## **B12 PRO-KIT | B12 SPORTLINE**

### **Performance Suspension Systems | Sport**

- Spring and damper technology simultaneously engineered, tuned and extensively tested
- Precision responsive handling and excellent driving performance
- Lower center of gravity - (up to 40 mm / Sportline up to 50 mm)
- Eibach Pro-Kit or Sportline performance springs
- Bilstein performance dampers with gas pressure technology - perfectly matched
- Made by Bilstein and Eibach
- Components certificate

## **PRO-LIFT-KIT**

### **Performance Lift Springs**

- A spring-system between street and off-road
- More ground clearance allows for moderate off-roading - up to 30 mm
- Cross-country handling with excellent ride quality
- Components certificate

## PRO-STREET-S

### Coil-Overs – Adjustable Ride Height

- Height adjustment from 20 to 70 mm vehicle lowering (depending upon vehicle type)
- Stainless steel design
- Sporty and comfortable in the normal range, appealingly taut in the threshold
- Certified adjustment area and complete documentation for an easy handling
- Combined with the Eibach Pro-Tronic it is the perfect alternative solution for replacing the adaptive OE suspension

## PRO-STREET-MULTI

### Coil-Overs – The All-Rounder

- Height- and damping-adjustable coilovers: individual adjustment of rebound and compression damping, even in an installed condition
- Lowering of 20-50 mm (depending on vehicle type)
- With bind resistant trapezoidal thread for future maintenance of height adjustability
- ZF Sachs Race Engineering mono-tube gas pressure dampers + Eibach Performance Springs
- Upside-down struts on the front for absorbing extreme transverse forces and a precise response
- Incl. parts certificate and hook wrench

# EIBACH REPLACEMENT LINE

High-quality spare parts components

- Engineered and made by Eibach
- Engineering and manufacturing according to OE-standards (ISO/TS 16949)
- 100% IN-HOUSE-PRODUCTION
- 100% MADE IN GERMANY
- 100% AVAILABILITY

**300% THE RIGHT DECISION**

**THE ORIGINAL OPTIMIZED. GUARANTEED!**
